

About DOFA

Earn with arcade NFT gaming

DOFA is a blockchain play-to-earn metaverse game, where players can earn DOFAM (Dofa Metaverse) tokens by taking part in several in-game activities. It can be playing in-game events, exploring in-game metaverse, trading power cards, and crafting goods in the market. Also, players can collect land plots and craft new fight abilities for their dragons and sell them as NFT tokens.

Metaverse

Explore DOFA lands

In addition to earning DOFAM tokens through arena battles, players can earn in-game money by taking part in PvP battles, crafting, and further selling of battle cards and game characters in the Marketplace. All of these mechanics require the purchase of in-game land in the form of NFT tokens. Buying land allows players to use advanced game mechanics in the form of PvP battles and to craft special combat skills of the characters.

Dragons

Express yourself

Each player can have several battle dragons - game characters. Players' dragons can fight each other on the arena or in PvP battles, using various upgrades and special ability cards. Special skill cards allow users to build the most advantageous PvP combat strategy against other players. One can obtain cards by crafting in the special zones of the land acquired by the player.

Roadmap

Launch

2021

Q3 First drafts
Q4 Whitepaper
Game Prototype

2023 Q1 - Q3

Community building
NFT/AIR Drops
Private investments

2024 Q2-Q4

PvP Battles

1

Deal 150% damage when HP is max

2

Successful attack restore 50 HP

3

Deal 20% more damage

4

Add 40% to shield when attacking

5

Steal energy from opponent

Tokens

DH and DOFAM tokens

Free-To-Play mechanic - players can participate in arena battles for free and earn in-game DH tokens. In addition to DH earning, this can lead to the increased player's position in the rankings, which will allow them to claim some of the regular token drops.

Over time, DH tokens will be brought to cryptocurrency exchanges and will be traded openly with exchanging tokens for fiat.

As soon as the player decides to participate in PvP battles, buy land, buildings, and engage in crafting to upgrade special skill cards and their own dragons, they may need to use DOFAM tokens.

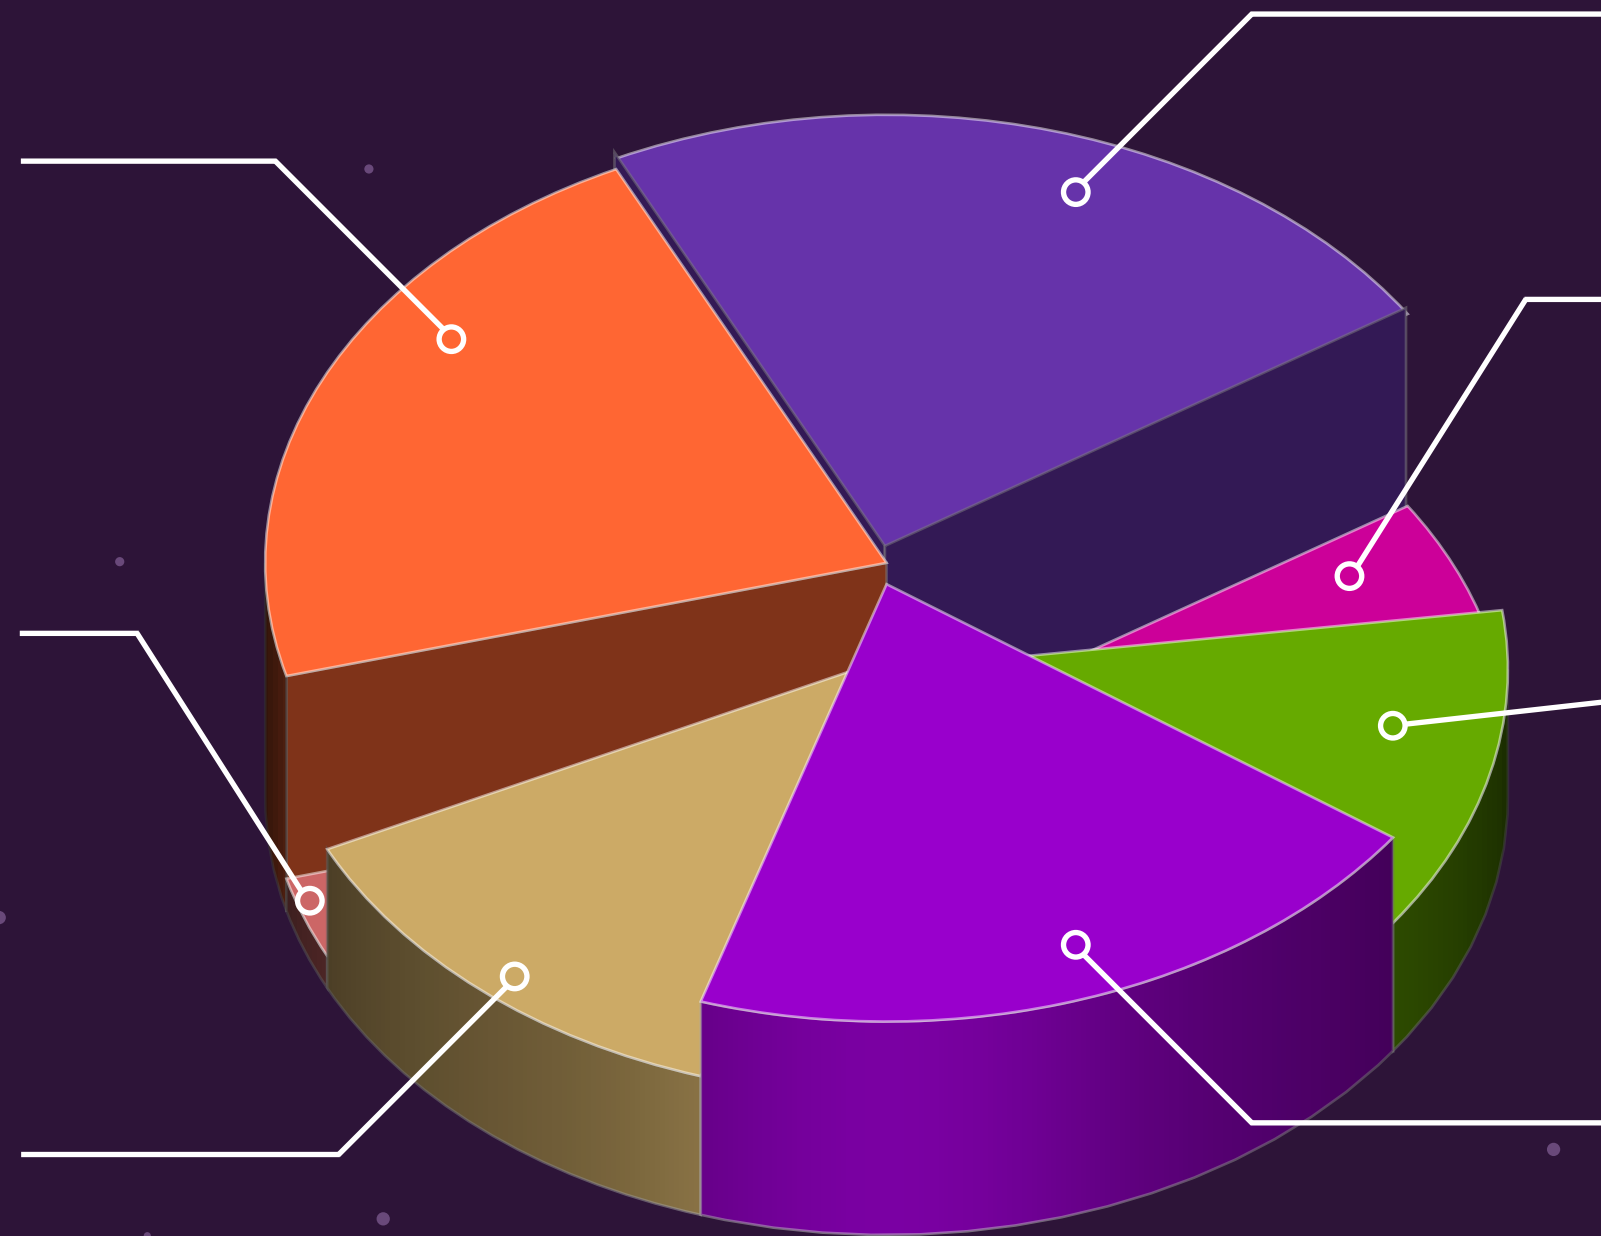

These tokens can be bought for fiat at cryptocurrency exchanges, as well as earned by defeating other players or getting them out of the chests.
